MOBILE APP DEVELOPMENT

PROJECT TITLE:

GoSMART

Matric Number	Name
A211532	MUHAMAD ALIM BIN MOHAMAD KHAIRANI

Problem Statement:

Problem Statement: GoSMART

SDG Alignment: This project addresses SDG 11 (Sustainable Cities and Communities)

The Problem: Commuters often face stress because they don't know if their bus or train is on time, or if the roads are blocked by traffic. Most people lack a single tool that shows both transit updates and the environmental impact of their travel.

The Solution (App Idea): GoSMART solves unpredictable commuting by merging real-time updates with environmental tracking in one simple app. It provides a smooth transit status and centralized tools for stations and routes, helping users avoid delays easily. To encourage green habits, the app tracks CO2 savings and uses gamification like levels and progress bars to turn sustainable travel into a rewarding daily game.

Peer Review Report:

Peer Review Report: MUHAMMAD ARIF FAHIM BIN MUHAMMAD SHARUL AZLEE (A211477)

UpSkill is a fantastic project that tackles SDG 4 (Quality Education) by making tech learning organized and easy to use on a mobile phone. You've successfully solved the problem of confusing platforms by creating a clean experience that doesn't feel overwhelming for new learners. The choice of warm brown and cream colors is a brilliant move because it makes the app feel friendly and inviting rather than cold and technical. Placing the "Daily Learning Goal" right at the top of the home screen is a great UX choice, as it provides instant motivation and helps students stay focused on their personal learning journey every time they open the app.

The app's navigation is simple and logical, making it easy to move from searching for a specific skill to seeing exactly what lessons are offered. The "What you'll learn" section is especially clear, using simple checkmarks to help students understand the value of a course in just a few seconds. To make the interface even better, you might consider changing the bright purple "Buy Now" button to match your earthy theme, as it currently feels a bit disconnected from the rest of your beautiful design. Also, moving the small floating menu icon to a more standard spot would give the layout a more balanced and professional look. Overall, this is a solid, functional tool that makes digital literacy much more reachable for everyone.
